More About Us

Working under the expert direction as well as guidance of our Chairman Mohammed Taiyab, we have successfully broadened our supply chain across the country and also formed the work excellence. With his sharp insight and experience of the respective domain, we have attained a distinct niche in the industry.

In the present engineering world, especially in the Indian Sub Continent, the solution for temporary housing is prefabricated building. In the field of offices, accommodation and villas, prefabricated buildings are contributing a major supporting role in the fastest growing industry with its low cost, simple design and housing structure.

MA PORTABLE CABINS (I) PVT LTD can cater to all types of Portable Cabin requirements . We ensure that we provide good quality and also make sure that the project is completed on time. We are in Portable Cabin industry since 2013 and we can assure you that we can provide good service at any time.

We maintain a long term relationship based on trust, with our customers like architects, builders, individual house owners etc. We have the distinct advantage of experienced and highly skilled professionals working for you. As a pre-eminent Portable Cabin company, established over 3 years ago which covers over 60 of our esteemed customers and having an annual turnover of 2 crore, we are looking ahead into the future.

COMPANY PROFILE

Quality

The manufacturing process is monitored at all stages to ensure that quality as well as safety procedures are followed. Efficient utilization of material and manpower is achieved by maintaining high standards in quality control. Timely completion and delivery is also achieved within the constraints of cost and quality.

Stringent quality controls and checks are carried out at the works to ensure that the products meet the required high standards. All workers are made aware of their responsibilities in maintaining the required standards in quality through quality training and guidance. Quality audit is undertaken as an integral part of the manufacturing process beginning from the raw material stage to the finished product stage.
